**Topix Media Lab Announces the Release of
Steve Spangler's 10-Minute Science Experiments
from bestselling author Steve Spangler**

Now available at more than 22,000 newsstands nationwide!

New York, New York: Topix Media Lab is proud to announce the latest work from bestselling author Steve Spangler, hitting newsstands across the U.S. and Canada on July 21, 2020.

Steve Spangler's 10-Minute Science Experiments is an entertaining and informative new bookazine, focused on simple science experiments that kids can conduct at home in 10 minutes or less. Each experiment includes an explanation for the science behind it and uses easy-to-find materials that readers probably already have in their home.

“I’m always delighted to work with Steve Spangler on any new project. His dedication to teaching children about the wonders of science is gratifying to be a part of. This new bookazine is one such example - a perfect resource for curious kids who are stuck at home over the summer,” says Phil Sexton, Publisher at Media Lab.

Steve Spangler is an authority on STEM education with more than 1,800 television appearances to his credit. He’s a regular guest on The Ellen Show and the host of the three-time Emmy-nominated television series, DIY Sci, airing on FOX affiliates nationwide. He is a best-selling author, an Emmy award-winning television personality, and a Hall of Fame Speaker inductee, as well as the bestselling author of three previous science books for kids: *Naked Eggs and Flying Potatoes*, *Fire Bubbles and Exploding Toothpaste* and *Smithsonian 10-Minute Science Experiments*.
